## JOB SHOP

### Castrol Superedge 6754

## 67% REDUCTION IN USAGE

### THE SITUATION

A water pipe manufacturer was experiencing poor bacterial resistance from their saw coolant, resulting in frequent changes for the individual systems. The coolant was being dumped monthly to eliminate odor issues.

### BEFORE CASTROL

- Customer was using traditional soluble to cut carbon pipe lengths.
- Standard procedure was to dispose of the coolant on a monthly basis to improve workspace environment.
- Procedure was resulting in excessive costs due to downtime, disposal costs and coolant purchases.

### THE SOLUTION

- Castrol Superedge 6754 employs state-of-the-additive technology to reduce bacterial growth without introducing harmful biocides into the workspace.
- Castrol Superedge 6754 is formulated with oil levels similar to those found in traditional heavy-duty soluble oils, thus providing improved lubrication over other long-life fluids.

- No bacteria growth to date
- 67% reduction in coolant usage.

### AFTER CASTROL

- The local Castrol distributor recommended replacement of saw coolant with Castrol Superedge 6754 to improve fluid life and reduce costs associated with frequent dumps.
